## About eMi<sup>2</sup>... Serving Christian Ministries: South Asia

Have you ever needed professional architectural or engineering help? Have you ever wished you had access to design consultants who understand your vision? We would like to provide the professional expertise you need to fulfill that Kingdom vision.

**eMi<sup>2</sup>** serves Christian ministries in South Asia that are helping the poor and proclaiming the gospel of Christ through Kingdom service. eMi<sup>2</sup> is the India Liaison office of Engineering Ministries International, a non-profit christian development organization located in Colorado Springs, USA. In operation since 1982, with projects in over 70 nations, eMi is the most professional and experienced cross-cultural non-profit design service available in the world.

In South Asia since 1998, eMi<sup>2</sup> has been networking Christian workers, volunteer design professionals, and student interns to carry out planning and design projects for schools, hospitals, orphanages, water supply systems, and training centers. Combining practical design and cultural experience, eMi<sup>2</sup> staff coordinate project work to develop a culturally sensitive design that expresses the ministry's vision.

**eMi<sup>2</sup>** provides design and planning services for approved development projects through a consultation process. The finished product typically consists of architectural or engineering drawings, reports, or estimates. The ministry can use these documents for project fundraising, long-range planning, or construction.

The ministry is asked to host the eMi<sup>2</sup> project team and to provide some of the travel expenses. This includes basic meals, simple lodging, and local transportation for the project team during the 7 to 10 day visit to the ministry, as well as the project leader's round-trip travel expenses from the North India office. eMi<sup>2</sup> relies on the gifts of engineers and lay persons for support; its staff members are financed by individuals and churches who desire to benefit the work of ministries in South Asia. **We are pleased to provide design services free of charge, but we do not fund the cost of construction, nor do we fund ministries.**

## We believe...

- In the verbal inspiration of the Bible.
- In one God, manifested in three persons.
- In the pre-existence of Christ, His virgin birth, His vicarious death on the cross, His resurrection and His second coming.
- In the person of the Holy Spirit, His convicting, regenerating, baptizing, sealing, indwelling, teaching and filling ministries.
- Man is created in the image of God, fallen through Adam's sin, redeemed only through the saving work of Jesus Christ.

## We provide... assistance for projects meeting the following criteria:

- The project must minister to the needs of the poor.
- There must be a direct and ongoing proclamation of the gospel of Jesus Christ.
- The property on which the project is to be built must be owned by the ministry.
- There must be a planned method of funding project construction and operation.

## Our goal...

is to meet your specific project design needs through a 3 step process:

### Step 1

**Technical Assistance Application...** This application helps us understand basic information about our clients, their ministries, and the project they are proposing.

### Step 2

**Conceptual Design...** With project approval, the design process can begin – starting with a pre-project meeting, followed by a visit to the site, and ending with the production of **Conceptual Design Documents**. These documents may be used in the fund-raising process or even for construction in certain cases. This step usually takes 6 to 8 months.

*Usually there is a time gap between steps 2&3 while the project moves closer to construction.*

### Step 3

**Detailed Design...** As the project approaches construction, the ministry may require a more detailed set of architectural and engineering plans. eMi<sup>2</sup> is able to work with the ministry to follow up on and refine the Conceptual Design Documents produced in Step 2, in order to produce **Detailed Design Documents**.

*"Your visit and work has really got us all focused properly. You have given us the tools to work with, making my job of communicating the vision a lot easier. My thanks to all of you."*

*- Ron Penny, Kollegal Girls Home, Karnataka, India*

If you are interested in engaging eMi<sup>2</sup> services for a specific development project, complete **STEP 1: Technical Assistance Application** and return it to eMi<sup>2</sup>. It is eMi's privilege to serve Christian ministries in South Asia and throughout the world.
